## **Title: Mobile Game Developer (AR)**

### **Project Overview**

The Mobile Game Developer will design and develop a high performance, user centric native application and should have ample experience in developing cross-platform mobile applications in Unity's game engine. The developer is expected to use the industry's best practices to all aspects in order to deliver value to the final product, while successfully completing the job properly and promptly to company's satisfaction.

This unique opportunity will focus on the integration and deployment phase, ergo assets, graphics and animations relevant to AR updates to create a polished, stunning design. In addition, other gameplay assets and third-party plugins will need to be developed to produce a functional, bug free HoloLens, iOS and Android application.

### **Responsibilities**

- Perform a technical analysis of mobile game development requirements
- Understand each device model specifications
- Develop cross-platform, targeting HoloLens, Android and iOS
- Design polished GUI, 3D models, animations and sprites to AAA standards
- Refine the local and online multiplayer gameplay
- Produce a solid, detailed wireframe and stunning interactive AR paradigms
- Establish defensive, clean, modular, robust coding to log user activity
- Knowledge of in-depth debugging to fix any and all bugs
- Contribute ideas for improving the application and speeding up development process
- Knowledge of marketing tools to drive demand
- Prepare and plan to work closely with and report weekly milestone progress to Project Manager
- Complete final goods to satisfaction in timely manner

### **Desired Qualifications**

- Bachelor's Degree
- Extensive experience with Unity's game engine
- Exceptional time management and organizational skill, including ability to prioritize and handle multiple tasks simultaneously
- Ability to learn quickly and produce high quality assets within designated deadlines

### **Required Qualifications**

- Must be a Junior or Senior pursuing a career in Mobile Game Development
- Proficient in Unity's game engine
- Excellent written and verbal communication skills
- Available to work a flexible weekly schedule and report in responsibly
